Recommendation

We wish to recommend Mr. Sudhir Panditrao and Mr. Shantaram Mayadeo and their team under the organization of M/S SAN Techno Mentors for their '**Training and Mentoring**' project for all round improvements in capabilities of participants.

M/S SAN Techno Mentors have conducted such a project from October 2014 to September 2015 at our organization which is engaged in producing steel re-bars from scrap.

The training/mentoring programme had classroom training targeted at all the participants in some basic subjects, hands on assignments to test their analytical skills, drive, and initiative; and also group discussions, role playing, and case studies in some soft skills related subjects.

With the efforts of Mentors, our engineers benefitted quite a lot in improving their capabilities Technical as well as Commercial and Soft Skills. Our company also experienced stable systems, reduction in down-times, and production increases.

Particular mention should be made regarding an assignment involving study of ladle wall temperatures and introduction of insulation tiles to reduce heat losses.

I wish and foresee success to SAN Techno Mentors in similar projects in other companies also.

Mr. D.B. Soni

Managing Director
